

Join a Community of Dedicated Professionals

The Child Educational Center was established in 1979 as a private, nonprofit to serve the Jet Propulsion Lab, Caltech and the general community. Our fundamental purpose is to assist children in learning to live a successful, creative and productive life, with love at the center of all experience. The program is founded on the philosophy that a child's social, emotional, cognitive and physical growth develops most successfully from a positive self-concept.

Our experienced and highly qualified teachers plan curriculum based on children's observed interests and abilities and give them the support they need to develop friendships and new skills. Teachers introduce new activities daily that reflect appropriate goals for children's development. In addition, outdoor play and exploration is an integral component of each day, encouraging children to develop knowledge and love of the natural world.

The CEC is seeking Associate and Lead Teachers to work in a dynamic and progressive research-based program that is a full day, twelve-month program. Associate and Lead Teachers are needed for Infant, Toddler, Preschool, and After-School Programs.

Requirements:

- Have an understanding of and a desire to work within a play-based philosophy with a strong emphasis on the Outdoor Classroom
- Must enjoy being outdoors and can expect to work in both indoors and outdoors (in all weather and temperatures) actively supporting and facilitating children's play
- Associate Teachers are required to have 24 units in ECE

Salary Rates: (based on education and experience)

Lead Teacher	\$20.16 - \$26.70
Associate Teacher	\$16.20 - \$18.56
